DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 59-64 and 68-74, drawn to an evanescent wave cavity-base optical sensor.

Group II, claims 65-67, drawn to a method of performing time-resolved sensing.

Group III, claim 75, drawn to a method of wavelength division multiplexing sensors.

Group IV, claims 76-82, 87-94 and 102-109, drawn to a waveguide-based cavity ring-down sensor.

Group V, claims 83-86 and 110-113, drawn to a waveguide-bases sensing method.

Group VI, claims 95-101, drawn to a method of characterizing a fiber optic system.

Group VII, claims 114-117, drawn to a fiber optic sensor.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I-III are related to an evanescent wave cavity-based optical sensor and a method of sensing and a method of multiplexing evanescent wave cavity-based sensors. Group I does not having the special technical method steps of Group II or the special technical multiplexing steps of Group II and Groups II and III do not have the special technical product features of Group I.

Groups IV-VI are related to a waveguide-based cavity ring-down sensor and a method of sensing and a method of characterizing a waveguide-based cavity ring-down sensors. Group IV does not having the special technical method steps of Group V or the special technical characterizing steps of Group VI and Groups V and VI do not have the special technical product features of Group IV.

Group VII is related to Groups I and IV in that they are sensors but lack the same special technical features of the signal processor or fiber optics or vice versa with the optical pump and probe of Group VII.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
